

Lance Bell –

Vice Chairman of Data & Technology, Kane County GOP

CEO & Chief Artificial Intelligence Officer, ServingIntel Inc.

Lance Bell is a Christ-follower, conservative innovator, and community leader serving as the **Vice Chairman of Data and Technology for the Kane County Republican Organization**. In this role, he is helping to modernize precinct operations through the responsible use of data and artificial intelligence—empowering precinct committeemen to reach more voters, more effectively.

Professionally, Lance is the **CEO and Chief Artificial Intelligence Officer of ServingIntel Inc.**, an Illinois-based technology company that develops enterprise-class software and artificial intelligence systems for the senior living and hospitality industries. Under his leadership, ServingIntel created the **first large language model (LLM) built specifically for senior living**, pioneering AI-driven tools that improve operations, analytics, and communication across organizations.

A visionary and early adopter of AI in business and civic life, Lance is passionate about **helping Republican leaders harness technology to regain influence at the local level**. His focus is on practical, results-driven applications of AI—tools that save time, improve messaging, and build stronger relationships with voters.

Lance combines his technical expertise with decades of executive leadership and grassroots experience. He's spoken at conferences on artificial intelligence, organizational leadership, and community engagement, always emphasizing the need for **faith, courage, and intelligence in political renewal**.

He lives in Kane County with his family and serves both his church and his community with the belief that **technology, when guided by truth and values, can strengthen freedom and restore the Republic**.

With blessings and respect,

Lance Bell - Kane County GOP, Vice Chairman, Data & Technology
